ZupZap app	Jul 2024 - Dec 2024
<ul style="list-style-type: none">Technologies Used: Flutter, Firebase, Android APIs, Location Services, NotificationsDeveloped and launched ZupZap, a hyperdelivery platform designed to connect businesses with their own fleet of riders for efficient, real-time deliveries.Implemented overlay notifications, ensuring timely alerts even when the app is running in the background or has been killed, enhancing user engagement.Integrated device location tracking to function seamlessly in the background or when the app is closed, ensuring accurate delivery status updates.Enhanced the user experience by adding custom sounds to overlay notifications, providing distinct alerts for riders and businesses.Managed critical app permissions, including call, location access, background running, and battery management to ensure smooth app performance and compliance with Android policies.Optimized app performance for background tasks, ensuring continuous and efficient delivery operations for users, even during system limitations.	
Team24 website	Jan 2025 - Jan 2025
<ul style="list-style-type: none">Designed and Developed a Corporate Website: Created a responsive and user-friendly website for Team24 using HTML, CSS, and Bootstrap, ensuring seamless navigation across devices.Translated Figma designs into a fully responsive website using HTML, CSS, and Bootstrap, ensuring pixel-perfect alignment with the provided UI/UX mockups.Structured Information Architecture: Organized key sections such as Company Information, Investor Details, Regulatory Compliance, and Product Range for easy access and improved user experience.Implemented Modern UI Components: Utilized Bootstrap for consistent styling, interactive tables, and clean typography to enhance visual appeal and professionalism.	

- VS Capital website**

| Feb 2025 - Feb 2025
- Designed & Developed a Financial Services Landing Page, Built a single-page responsive website for VS Capital (loan services) using HTML, CSS, and Bootstrap, featuring clear CTAs, eligibility criteria, and contact forms to drive user engagement.
 - Focused on User-Centric Design Structured content for clarity—loan offerings, eligibility sections, and enquiry forms—to simplify complex financial information and improve conversion rates.
 - Highlighted Business Value Proposition Crafted compelling About Us and Eligibility Criteria sections to communicate trust, transparency, and tailored loan solutions for Surat-based clients.
 - Integrated Functional Contact Forms Implemented an enquiry form with required fields and contact details, ensuring seamless lead generation for the business.
-

CERTIFICATIONS

- Web Development Certification | Jemistry Info Solution**

| May 2022 - Jul 2022
- Completed a 2-month internship where I developed and debugged web applications using HTML, CSS, and JavaScript, while adhering to industry best practices. Recognized by HR for exceeding performance expectations, I demonstrated strong problem-solving skills, adaptability, and a self-motivated approach to learning new technologies in a professional environment. This experience enhanced my proficiency in responsive design, UI/UX principles, and collaborative development workflows.

- Flutter Developer Certification | Fablead Technolab**

| Dec 2022 - Jun 2023
- Completed a 6-month intensive internship in Flutter development under expert mentorship, successfully delivering mobile applications while earning a stipend of ₹10,000/month (6 months). Developed cross-platform mobile solutions using Dart and Flutter framework, contributing to real-world projects from concept to implementation. The internship evaluation confirmed successful fulfillment of all technical criteria while maintaining originality in development work, enhancing my skills in UI design, state management, and API integration.
